

Classification of soils adopted in scientific articles published in Agriambi Journal

If the soil classification is in the article title, the United States classification (2014) must be included in the English title, and the EMBRAPA classification (2018) in the Portuguese title. In the Abstract and in Material and Methods, the classification of the United States (2014) must be included. The Resumo must contain the classification of EMBRAPA (2018).
